

Webinar: Learning Outcomes

Thank you for watching this online webinar presented for the International Masonry Institute (IMI):

January 5, 2021

Masonry: Let's Get Creative

Here's a recap of what we covered:

- **Gusto 501**—unique terra cotta applications and understand the building code requirements for non-conventional stone anchors.
- **Portland Courthouse**—how to produce quality mockups and testing for exterior stone cladding on aluminum rail systems to ensure the system performs as designed, protecting occupant safety.
- **Vanderbilt University**—traditional institutional masonry installation and how prefabrication can save time on the project schedule and make difficult installations safer and easier to install.
- **"Floating Stair"**—how to improve building performance using stone and masonry as structure.
