

Webinar: Learning Outcomes

Thank you for watching this online webinar. This is also available as 1.0 credit hour of structured learning through the Natural Stone Institute.

September 29, 2020

Stone Cladding Technologies: Getting it Right the First Time

Is the selected material and anchoring system suitable for your application? Find out what stone cladding technologies exist and explore key factors for “Getting it right the first time.”

Here’s a recap of what we learned:

- **Various Types of Cladding**—examples of cladding projects including a case study on the University of Minnesota McNamara Alumni Center.
- **Key Factors**—that are important to ensure your project is done right the first time including: material selection, structural Integrity, shop drawings, anchor design, and anchors.
- **Codes & Regulations**—to monitor anchor design and spacing. Discussed essential items for designers, other factors affecting design, and why testing is important for safety.
