Exploring Structural Solutions: for Mason | Stone | Thin Veneer Facade

Zak World of Facades is an international conference series on facade design + engineering. The event has attracted over 27,000 delegates across its 80+ completed editions worldwide to date. Designed as a one-day conference—Mike Picco was a returning speaker to its first Toronto edition.

Here's a recap of what we shared:

- **Building success**—with a collaborative approach to facade design.
- **Designing Solutions**—to meet demanding criteria and complex architecture.
- **Innovative Engineered**—facade solutions and PICCO project case studies.

ZAK WORLD OF FAÇADES
